Woodfire C12 boiler stove

An extremely efficient, contemporary, 12kW boiler stove which can be installed to pressurised or vented systems.

A dedicated woodburner and a contemporary boiler stove with a decent output to water, and a sensible price tag.

The Woodfire C12 comes complete with overheat safety coil and overheat safety valve system which flushes mains cold water through a coil in the boiler and then to waste in the event of overheating.

Also available as a flat top version – the F12.

Technical information

Max heat output	12kW (10.8kW to water)
Nominal heat output	10kW (9kW to water)
Efficiency	82.00%
Max operating pressure	2.5 bar
Flue diameter	150 mm
Back of stove to centre of flue	150mm
Dimensions H W D	890 x 655 x 445 mm
Firebox H W D	560 x 330 x 330 mm
Window size H W	390 x 280mm
Flow and return tapping size	1 1/4" internal thread
Overheat safety coil tapping size	3/4" external thread
Thermostat port tapping size	1/2" internal thread
Min chimney draw	10 Pa
CO	0.90%
Flue gas temperature	275°C

Tapping points

1	Flow
2	Return
3	Thermostat port for overheat safety valve.
4	Thermostat port if another thermostat is to be used in the system. Otherwise blank off this port.
5	Overheat safety coil, cold water inlet.
6	Overheat safety coil, hot water outlet.
